

This project is about the insurance sector in India.
For that I get data from data.gov.in and by using of tableau I analyze this data.

Step-1:

Create the different sheet like:

- 1) In India insurance's premium income for that use bar chart
- 2) Outside India insurance's premium income for that use bar chart
- 3) Comparison of Outside India insurance's premium income with inside india insurance's income for that use line chart.

Step-2:

Create Dashboard.

Step-3:

Create Story.

Below is screen shot of dashboard
